

The UFO sighting

It was a cold windy day in the bathgate hills, the birds were singing and the trees were dancing in the wind, this was the day that three friends decided to explore the bathgate hills which would lead to their downfall. It was the 24th of September 1992, Matthew, Anna-leigh and Beth were on route to bathgate hills to explore the surroundings. As soon as they got there the trees started rumbling, the clouds were turning dark grey and the sky was becoming misty. Slowly they crept into the hills and started venturing. While they were walking Anna-leigh got a bad feeling, shivers were going down her spine and her legs started shaking. Without a second thought she ran for it and left Matthew and Beth in utter shock. They both started chasing after Anna-leigh but she was nowhere to be found! As they were chasing after her they spotted a few footprints leading in a completely random direction, but there was a problem! After following the footprints they suddenly stopped. In front was a huge dent laying in the shape of an insanely huge circle! There was smoke coming from the ground and there was no remains. They both stayed silent for about a minute until suddenly they both ran for it. After running for what seemed like forever they finally made it outside! Ever since then they never came back to the bathgate hills...
