The Man Who got "inured" by Aliens Mythe

in the year 1870, was taking a walk in the Woods heading up to the beethgate hill on a large afternoon. While walking through the dark, mucky and misty forest he spots something in the sky far in the distance. It looked very bright, very silver and very round high up in the dark navy sky and next thing he knows, Boom! he's Passed out on the mucky mind. after a few minutes, he wakes up and finds cuts and bruises all over him then calls the Police and tells them about how he saw a UFO and tells them that got inured by aliens. But till this day, this mythe still is unknown. Scientists, Police ect have looked for years and years on end, but still no luck.
