The Silver man

I was driving down the road with my friend, It was midnight we were passing a bunch of trees and bushes. Until one of my friends said "hey did you guys see that" "what?" I replied then looked around and a quick flash across my eyes. I felt surprised it was on the side of the road. We stopped to look back, and there it was. A big bulky creature as we started to drive away again we realised it had no face but we heard it snarling at us, It was 7 feet tall and it faced us like we interrupted it... And that's when we realised how fast it ran. It ran approximately 70 mph. We were petrified, frozen in place looking back to see where it went. It seemed like it ran away to the forest, it hid in the bushes, we knew it. It was still snarling, slowly getting closer we drove away quickly and that's when we checked behind. It was running after us...
